Home: 18, Odunfa Street Okerube, Lagos, 100275 Lagos (Nigeria)

ABOUT ME

With a keen eye for detail and a solid foundation from Holberton School, I craft responsive, intuitive software solutions using ReactJS, TypeScript, NestJS, MySQL, and more. My approach combines technical precision with a user-focused mindset—refining experiences that not only work well but feel right. At Euro Scholars Poland, I empowered students to navigate the tech landscape, helping build systems that impact Africa with accuracy and relevance. Passionate about continuous learning and collaboration, I bring integrity, empathy, and clarity into every team and product I work with. Based in Nigeria and open to remote opportunities, I also enjoy mentoring young developers and exploring how design and development shape human experience.

WORK EXPERIENCE

First Bank of Nigeria LTD – Lagos, Nigeria

Address: 35, Marina Lagos, 100221 Lagos (Nigeria) | **Website:** <https://www.firstbanknigeria.com/> | **Name of unit or department:** Technology Department - **Business or sector:** Financial and insurance activities

Software Engineer

[06/05/2024 – Current]

- Designed and implemented responsive, user-friendly interfaces using React.js, TypeScript, and TailwindCSS, ensuring seamless user experiences across web platforms.
- Tweak UIs for user satisfaction.
- Integrated RESTful APIs to enable dynamic data rendering and real-time updates, improving user interactivity and system functionality.
- Collaborated closely with UX/UI designers and back-end developers to convert product requirements into clean and maintainable code.
- Optimized application performance by identifying and fixing rendering bottlenecks and reducing load times.
- Participated in Agile sprints, daily standups, and regular sprint planning sessions, contributing to iterative product improvement.
- Ensured cross-browser compatibility.
- Implemented secure front-end patterns to comply with financial industry regulations.

Euro Scholars Poland – London, United Kingdom

Address: 12, Constance Street, International House, E16 2DQ London (United Kingdom) | **Website:** <https://euroscholars.pl/> | **Email address:** recruitment@euroscholars.pl | **Business or sector:** Education

Technical Advisor | Student Support

[18/10/2021 – 15/11/2022]

- Provided technical assistance and mentorship to students navigating web development, programming, and software engineering concepts.
- Conducted one-on-one advisory sessions, offering personalized guidance on project work, career paths, and portfolio development.

- Facilitated workshops and Q&A sessions on common challenges career development.
- Offered ongoing motivation and accountability, helping students maintain progress and confidence through their learning journey.
- Acted as a bridge between students and the broader Euro Scholars tech network, supporting access to internships and growth opportunities.

First Bank of Nigeria LTD – Lagos, Nigeria

Address: 35, Marina Lagos, 100221 Lagos (Nigeria)

Internship

[11/02/2019 – 27/09/2019]

- Assisted the Operational Risk team in monitoring and documenting risk events, loss incidents, and internal controls across departments.
- Participated in risk assessments to identify potential threats to business processes and contributed to the development of mitigation strategies.
- Gained hands-on exposure to ISO 27001 principles through an Information & Cybersecurity awareness certification, with focus on data protection, confidentiality, and incident response protocols.
- Supported audits and compliance reviews by collecting relevant documentation and ensuring alignment with internal risk policies.
- Helped update risk registers, log events, and track resolution of outstanding risk issues using risk management tools and spreadsheets.
- Collaborated with different units to ensure adherence to operational procedures and improved awareness of risk exposure in daily banking operations.
- Attended team briefings and contributed to discussions on risk culture, business continuity, and cybersecurity frameworks.

EDUCATION AND TRAINING

Full Stack Software Engineering With Specialization in Front-End Development

Holberton School - ALX [15/08/2022 – 30/10/2023]

Address: ITF House, Plot 12 Funsho Williams Avenue Iponri (Costain), Surulere, 101211 Lagos (Nigeria) | **Website:** <https://www.holbertonschool.com/> | **Field(s) of study:** Information and Communication Technologies: • Software and applications development and analysis

- **Software Development:** Built responsive, interactive interfaces using **HTML, CSS, JavaScript, React, TailwindCSS** and developed scalable server-side applications using **Node.js, Express, and NestJS**.
- **Database Management:** Designed and integrated databases using **MySQL, PostgreSQL, and ORM tools** (e.g., Prisma, TypeORM).
- **Scripting & Automation:** Wrote efficient scripts in **Python, Shell (Bash), and JavaScript** to automate tasks and solve engineering problems.
- **API Design & Integration:** Built and consumed **RESTful APIs**, handled request/response cycles, and implemented secure data exchange practices.
- **Server & Infrastructure Management:** Deployed and maintained servers (using **Linux, NGINX**) and gained foundational knowledge of cloud environments.
- **Version Control:** Proficient in **Git** and **GitHub** workflows for team collaboration and project management.
- Worked on real-world projects involving end-to-end product development, from **UI design to database schema (Airbnb)**.
- Applied **data structures and algorithms** to optimize code performance and improve system efficiency.
- **Team Collaboration:** Worked in agile teams using tools like **Trello, Slack, and Zoom**, simulating real workplace environments.
- **Critical Thinking:** Tackled project challenges through structured problem analysis and creative solutions.
- **Communication:** Wrote clear technical documentation and presented projects to peers and mentors.

Bachelor's Degree

Adeleke University [12/09/2017 – 20/07/2020]

Address: QF66+4JM, Osogbo Road, Ede, Osun State, 232104 Ede (Nigeria) | Website: <https://adelekeuniversity.edu.ng/> | Field(s) of study: Computer Science

- **Programming Languages:** Proficient in languages such as **C/C++**, **Python**, and **JavaScript**, with strong understanding of syntax, logic, and problem-solving.
- **Data Structures & Algorithms:** Designed and implemented efficient algorithms; applied sorting, searching, and graph algorithms to solve real-world problems.
- **Web Technologies:** Gained foundational skills in **HTML**, **CSS**, and **JavaScript** for building basic interactive web applications.
- **Communication:** Explained technical concepts in presentations and reports; collaborated with peers and faculty.
- **Time Management:** Balanced coursework, projects, and exams under strict deadlines.
- **Teamwork & Collaboration:** Participated in group assignments and hackathons, often in cross-functional teams.
- **Adaptability:** Learned new tools, programming paradigms, and technologies in a constantly evolving tech environment.

LANGUAGE SKILLS

Mother tongue(s): English

SKILLS

Software

Github / CSS & Sass (+Bootstrap & TailwindCSS) / NestJS Framework / Effective communication / TypeScript / ReactJS Library / MySQL / Git

Office

Microsoft Office package: Microsoft Word, Excel, PowerPoint, Access

PROJECTS

[20/09/2023 – 24/05/2024]

The Wild Oasis

This application is an hotel management system. It helps simplify the activities of the hotel and keeps track as well as statistics of the hotel. Features such as booking, check-in, check-out, etc are available. It is an internal application only. In the nearest future, implementation booking feature will be available to customers to be able to book from the comfort of their homes.

Link: <https://the-wild-oasis-alpha-eight.vercel.app/>

[03/08/2023 – 24/10/2023]

Travel List

This application keeps track of travel items. When a list of travel item is added, the user can check each list after it has been packed successfully. A notification will pop-up after all list have been checked.

Link: <https://travel-list-chi-lilac.vercel.app/>

[08/05/2023 – 27/06/2023]

Fast React Pizza

This application displays a list of pizza for a restaurant. Information about the price and availability are also included. Customer are able to create orders and add their location for delivery.

Link: <https://fast-react-pizza-nu.vercel.app/>

PUBLICATIONS

[2023]

Music Recommendation Systems

An in-depth article exploring how machine learning and user behavior data can be used to build personalized music recommendation systems. Covered key concepts such as content-based filtering, collaborative filtering, and the role of algorithms in improving user engagement on music platforms.

Authors: Oluwatobi, Kelvin, Onajite | **Publisher:** LinkedIn

[2023]

Post-Mortem | Incident Report

A detailed post-mortem analyzing a real-life system incident—outlining what went wrong, the root causes, impact on users, and how the issue was resolved. The article emphasizes lessons learned, preventive measures implemented, and the importance of transparency and accountability in handling technical failures.

Authors: Oluwatobi, Kelvin, Onajite | **Publisher:** LinkedIn

HOBBIES AND INTERESTS

Gaming

I enjoy immersive gaming experiences that challenge strategic thinking, creativity, and quick decision-making.

Gaming also helps me connect with a global community and stay curious about evolving technologies in the entertainment and simulation space.

Technology and Innovation

I'm passionate about exploring emerging technologies and how they shape the future—from AI and Web3 to hardware advancements and software trends. I enjoy engaging in conversations around innovation, disruptive ideas, and tech that solves real-world problems.

Music

Music is my escape and inspiration. I enjoy exploring different genres—from afrobeat to classical—and often listen to music while working to boost creativity and focus. It's also a way for me to connect with cultures and emotions.

Sports

Whether it's football, athletics, or a casual workout, I love staying physically active and following competitive sports. I find that sports teach discipline, resilience, and teamwork—values that I bring into my professional life.

CERTIFICATIONS

[15/09/2023]

Front End Development Libraries

Gained hands-on experience building interactive, responsive web interfaces using HTML, CSS, JavaScript, and frontend

frameworks like ReactJS, Sass, Bootstrap and, TailwindCSS. Developed projects that emphasize usability, accessibility, and modern UI design principles.

Link: https://www.freecodecamp.org/certification/Adeniyi_Tobi/front-end-development-libraries

[16/08/2023]

JavaScript Algorithms and Data Structures

Strengthened core programming skills by implementing algorithms, solving coding challenges, and mastering key data structures (arrays, objects, stacks, queues, etc.). Built a solid foundation in JavaScript logic and problem-solving.

Link: https://www.freecodecamp.org/certification/Adeniyi_Tobi/javascript-algorithms-and-data-structures

[02/08/2023]

Responsive Web Design

Learned how to create websites that adapt seamlessly across devices using CSS Flexbox, Grid, and media queries.

Focused on layout, mobile-first design, and user accessibility to ensure optimal user experience on any screen size.

Link: https://www.freecodecamp.org/certification/Adeniyi_Tobi/responsive-web-design

[19/07/2023]

JavaScript Basics

Covered the fundamentals of JavaScript syntax, variables, functions, control flow, and DOM manipulation. Built small interactive applications to understand how scripting drives web behavior.

ID: 24921969914766
